Project name: Frontend

Overview and Objective

I have created a frontend page which shows "about us" of any company. Shows a brief detail of any company. So, the page which is in the index.html is showing about **Kisan Network.**

Deployed Link:

https://elated-lalande-e20a7f.netlify.app/

GitHub repository

https://github.com/prashantsinghmangat/frontend-project/tree/main/frontend

Quick start and installation steps

1. Unzip the frontend.zip file
2. Open the folder and search for "index.html"
3. Open the index.html file and this will ready to view in browser
4. If need to see the CSS then search for "Style.css" and you can open it in any coding software like VS code.
5. For viewing bootstrap

Content It contains

- Company name
- Company Logo
- Header
- Short intro
- Brief intro
- More in this series
- Related articles
- Submenu
- Contact Details
- Map or location
- Footer

Zip consists of 4 folders, index.html and style.css.

CSS folders contains all the files related to responsive, style, bootstrap.

Font folder consists of fonts.

Images folder consists of logo and images

JS folder consists of JavaScript

Typography

First and foremost, typography is about usability. Type is the user interface for conveying information, and conveying information is what we're here to do on the web. There are many levers we can pull to affect the usability of reading text, and only by being deliberate about these can we create a pleasant experience for our users.

and marginal farmers across the country to sell their produce directly to businesses, using their smartphone. No middlemen are involved in the entire process as Kisan Network takes care of everything else, from the farm to the buyer's doorstep. There are more than 100 million cultivators in India whom we need to serve and we have an ambitious vision for an open and free online agricultural market in the country, that clocks in at around $200 Billion. Our investors, which includes Y

"Kian Network takes complete control of the supply chain. Kisan Network connects Indian farmers directly to businesses across the country by taking complete control of the supply chain. Each step is captured and monitored by our tech enabled rural management portal."
